Functions and Features

Built-in 1080P Touch Screen

Built in 5.5-inch 1080p touch screen, users can easily control the video cutout sources, adjusts the screen ratio, set the virtual camera movement by pinching and swiping or simply click the touch screen.

HDMI Dual Output for Multi-Screen Preview

It is equipped with dual HDMI outputs, which can transmit the program screen to two displays at the same time, and can easily fit the needs of multi preview in the live broadcast.

Multi Virtual Cameras Movement

MC-4K support multi-camera movement among the 4 cutout or regions of interest from a 4K camera, bringing a smooth visual experience to the audience. Users can adjust the camera speed to make the live broadcast studio more distinctive. Whether it's quick switch or slow transition, the camera movement function can be easily handled and meet your different creative needs.

**Virtual Camera Movement**

Create Full HD Virtual Multi-Camera Video from One Single 4K Camera

As 4K cameras are widely used, but the full 4K resolution is not required for streamed content, users can utilized the 4K camera to obtain 4 cut out or regions of interest by MC-4K, to produce full HD virtual multi-camera video from a single 4K camera.

Easy Switching Between Horizontal and Vertical Screen

MC-4K support switching between horizontal and vertical screens, so user don't need to worry about the camera rotation direction during the live streaming in various application. Besides this, MC-4K also provides screen flip function. No matter how your device is placed, you can easily adjust the image to the best state to make your live broadcast smoother.

Applications

Live Interview

MC-4K is perfect for live interview application with the cropping function. For example, cut out the characters image as close up image, and do camera movement within those cropped images to realize vivid live interview. MC-4K help you reduce the amount of cameras needed, and save the budget.

E-Commerce Live Streaming

MC-4K is the best choice for e-commerce live stream studios. It can realize multiple cameras switching, like full shot and close-up shot between the anchor and the product. In addition, user can also add preset LUT files to MC-4K, so that we can display the color details of the product more vividly to the audience during the E-commerce live streaming, bringing more traffic to the live streaming studio.
